Message from the Guest Editor

Dear Colleagues,

Dogs, being one of the most common pets in Western societies and showing several human-analogue behaviours, have been intensively studied. It has been argued recently that, in addition to their awake-behaviours, dogs' sleep-related functions are also both excellent models of comparable human functions as well as important for their well-being and veterinary treatment. This Special Issue will collect empirical research as well as opinion/review papers relating to canine sleep including, but not limited to, observations under natural conditions and laboratory-based research about broadly defined physiology and behaviour. Our aim is to bring together new and emerging findings from the field of canine sleep research in order to raise awareness of its importance and far-reaching relevance.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in 'Agriculture, Dairy & Animal Science'; 13/143 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
