### Message from the Guest Editor

Dear Colleagues,

I'm very honored to invite You to submit articles in this special issue of *Animals* focused on surgical oncology in companion animals.

The management of a companion animal affected by a tumor can include surgical procedures in many steps, from the first biopsy to metastasectomy, and with different intents, from curative to palliative. Surgery can be a therapeutic procedure influencing the prognosis, but also a diagnostic tool for a correct oncological staging. The purpose of this special issue is to collect studies focused on new surgical techniques and approaches, as well as studies revealing the prognostic impact of surgery in the management of companion animals with cancer. Research articles, case report, case series and original reviews are invited to this Special Issue.
