Deadline for manuscript
submissions:

closed (28 February 2021)

Message from the Guest Editors

animal-assisted interventions (AAls) are used in a variety of settings and populations for their cost-effectiveness and positive impacts on wellbeing and psycho-social functioning. AAls continue to generate a great interest in scientific communities and clinical environments, highlighting the strong significance of the interactions and bonds between animals and human beings. However, scholars use different methods and definitions, and it is hard to find common working methods. Therefore, as researchers, we need to open an international and interdisciplinary discussion about this matter, with a particular focus on the different working methods used worldwide which also include the choice of the species and the individual animals.

This Special Issue is open to any subject area related to recent advances in the three main AAls' souls: Animal Assisted Therapy (AAT), Animal Assisted Activities (AAA), and Animal Assisted Education (AAE).

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 3.0 (2022, ranks 12 /62 (Q1) in 'Agriculture, Dairy & Animal Science'; 13/143 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.2.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
