Deadline for manuscript  
submissions:

**closed (31 July 2022)**

### Message from the Guest Editors

Dear Colleagues,

We are pleased to inform you of a Special Issue entitled “Infectious Diseases in Farm Animals”. Infectious diseases, particularly zoonotic ones, have clear importance in our current society with regards to the economics of local and international animal farming, food safety and Public Health. There is a global demand for further and intensive research on this subject. Understanding how pathogenic agents are transmitted among animals or from animals to humans, as well as their pathogenicity, will lead to effective preventive measures with tangible benefits.

This Special Issue aims to gather original manuscripts focused on infectious diseases’ etiology, pathogenesis, clinicopathological findings, diagnosis, treatment and control. Interesting case reports will also be considered for publication.

Dr. Nektarios D Giadinis

Dr. Evanthia Petridou
