### Message from the Guest Editors

Dear colleagues,

The role of epithelia in immune response is a significant and dynamically developing topic. Epithelial cells are the first line of innate immunity and release a number of agents regulating immune response. Their role in infectious diseases, allergies, and autoimmune diseases has been proven, mainly in human diseases and their animal models. In veterinary medicine, the topic remains less explored, encouraging further investigation. The aim of the Special Issue of *Animals*, titled "The Participation of Epithelial Cells in the Immune Response" is to collect, explore, and summarize the data regarding the topic. Review and experimental works concerning domestic and wild animals are both welcome. Data collected from the mouse models of human diseases may also be considered, but the impact of the research on animals needs to be proven.

Deadline for manuscript  
submissions:

**closed (30 November 2021)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in ‘Agriculture, Dairy & Animal Science’; 16/167 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.0.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
