submissions:

**closed (28 February 2013)**

### Message from the Guest Editor

Dear Colleagues,

The welfare of farm animals is facing a challenging future. On the one hand, the need to feed a rising human population has led to calls for greater “efficiency” in animal production, potentially putting animal welfare at risk. On the other hand, new technology is providing opportunities for monitoring the health and well-being of farm animals that could improve their welfare in an unprecedented way.

Original manuscripts that address either or both of these issues are invited for this special issue, particularly those that describe (1) new technologies for assessing and measuring animal welfare, (2) the impact of new technologies on animal welfare, both positive and negative (3) means of addressing the potential conflicts between animal welfare, environmental protection and feeding humans.

Prof. Dr. Marian Stamp Dawkins

## Message from the Editor-in-Chief

*Animals* is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in ‘Agriculture, Dairy & Animal Science’; 16/167 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.0.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

**Journal Rank:** JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
