Message from the Guest Editors

Despite a vast scientific knowledge in all areas of calf health and husbandry calf mortality and morbidity are still unacceptably high all around the world. Especially the classical multifactorial diseases diarrhea and respiratory disease cause huge economic losses to the dairy and beef industry due to calf losses, treatment costs and poor performance. We know for a long time how important colostrum management is for calf health, and still failure of passive transfer is generally found in problem herds. There has been major scientific progress in dairy calf nutrition, but the uptake of new recommendations by the industry is slow. In this Special Issue, we welcome original research papers and reviews dealing with all aspects of calf health and performance on individual animal or herd level. We also invite papers that help understand and bridge the knowledge-behavior gap related to calf rearing.

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in ‘Agriculture, Dairy & Animal Science’; 16/167 (Q1) in ‘Veterinary Sciences’), 5-Year Impact Factor: 3.0.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
