New Approaches in Ruminant Reproduction

Guest Editors:

Dr. Luis Anel-Lopez

Anatomy, Department of
Veterinary Medicine, Surgery and
Anatomy, University of León,
24071 León, Spain

Dr. M.F. Riesco

Cellular Biology, Department of
Molecular Biology, University of
León, 24071 León, Spain

Deadline for manuscript
submissions:

closed (15 August 2022)

Message from the Guest Editors

The aim of this Special Issue is therefore to collate a body of work on the topic “New Approaches in ” to detail the current progress and issues and present future solutions. Our challenge as researchers is to deliver reliable and practical methods, with a special interest in novel approaches, to improve the main artificial reproductive techniques to achieve efficient solutions for the livestock sector.

Original manuscripts that address any aspects of “ruminant reproduction” are invited for this Special Issue. However, topics of particular interest include sperm assessment and preservation, gamete manipulation, reproduction and obstetrics, and productive aspects related to reproduction and animal management.
