Message from the Guest Editors

The human population is expected to increase from 7.2 to 9.6 billion by 2050, with a dramatic increase in demand for livestock products in the future. Livestock can contribute greatly to food security because it supplies calories, proteins, and essential micronutrients; it can exploit areas where crops grow with difficulty; and it uses feeds that, in several cases, are not appropriate for human consumption. Nonetheless, animal products, meat and pork cured products in particular, are criticized because of their ethical and environmental implications, whereas their nutritional profile is affected by health concerns. The purpose of this Special Issue is therefore to give visibility to the effort of international research to improve these aspects. Articles relating to innovations adopted to enhance the ethical and nutritional properties of meat and cured products supplied by pig chains will be welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Animals is an on-line open access journal that was first published in 2011. *Animals* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues in the many varied disciplines that involve animals, with a focus on animal science, animal welfare and animal ethics. *Animals* is covered in the Science Citation Index Expanded (SCIE) in Web of Science, with the latest Impact Factor: 2.7 (2023, ranks 10/80 (Q1) in 'Agriculture, Dairy & Animal Science'; 16/167 (Q1) in 'Veterinary Sciences'), 5-Year Impact Factor: 3.0.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, Animal Science Database, CAB Abstracts, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
