## Antibiotic Residues, Antimicrobial Resistance and Intervention Strategies of Foodborne Pathogens, 2nd Edition

Guest Editors:

### Prof. Dr. Yongning Wu

China National Center for Food Safety Risk Assessment, NHC Key Laboratory of Food Safety Risk Assessment, and Chinese Academy of Medical Sciences Research Unit (2019RU014), Beijing 100022, China

### Prof. Dr. Zhenling Zeng

National Risk Assessment Laboratory for Antimicrobial Resistance of Animal Original Bacteria, South China Agricultural University, Guangzhou, China

Deadline for manuscript submissions:

**24 November 2024**

### Message from the Guest Editors

Dear Colleagues,

The first volume of this Special Issue, “Antibiotic Residues, Antimicrobial Resistance and Intervention Strategies of Foodborne Pathogens”, was published in March 2023. It was a successful Special Issue, with 16 published papers, and has encouraged us to open a second volume on the same topic.

This Special Issue will celebrate World Antimicrobial Resistance Week (November 18~24), set up by the FAO/UNEP/WAHO/WHO with a Tertiary Party Joint Action Plan for One Health, and brings together a diverse collection of articles from experts across various disciplines, including microbiology, pharmacy, epidemiology, and enviroontology. The topics of interest include, but are not limited to, the following:

- Antibiotic residues;
- Antibiotic resistance genes;
- Antimicrobial resistance;
- Food safety;
- Foodborne pathogen;
- Intervention strategies;
- One Health.

## Editor-in-Chief

### Prof. Dr. Nicholas Dixon

School of Chemistry and  
Molecular Bioscience, University  
of Wollongong, Wollongong, NSW  
2522, Australia

## Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
