Deadline for manuscript  
submissions:

**closed (31 May 2021)**

### Message from the Guest Editor

Dear Colleagues,

Antibiotic resistance is a growing problem among bacterial populations. There is a dire need for new antibiotics to combat the antibiotic resistance problem. Many new drugs being developed are derivatives of older antibiotics that have the same mechanism of action. Ideally, new antibiotics with novel mechanisms of action could help to minimize the antibiotic resistance problem associated with bacteria. This Special Issue will focus on current research that is involved in characterizing new anti-bacterial drugs with mechanisms of action that are distinct from approved drugs on the market.

**Keywords:** mechanism of action; anti-bacterial drugs; antibiotics; novel drugs; novel scaffolds

## Message from the Editor-in-Chief

There are very few fields that attract as much attention as scientific endeavor related to antibiotic discovery, use and preservation. The public, patients, scientists, clinicians, policy-makers, NGOs, governments, and supra-governmental organizations are all focusing intensively on it: all are concerned that we use our existing agents more effectively, and develop and evaluate new interventions in time to face emerging challenges for the benefit of present and future generations. We need every discipline to contribute and collaborate: molecular, microbiological, clinical, epidemiological, geographic, economic, social scientific and policy disciples are all key. *Antibiotics* is a nimble, inclusive and rigorous indexed journal as an enabling platform for all who can contribute to solving the greatest broad concerns of the modern world.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (General Pharmacology, Toxicology and Pharmaceutics)
