## Advances in Vitamin E Research

Guest Editors:

**Prof. Dr. William L. Stone**

Department of Pediatrics, James H. Quillen College of Medicine, East Tennessee State University, Johnson City, TN 37614, USA

**Dr. Victoria Palau**

Bill Gatton College of Pharmacy, Pharmaceutical Sciences, East Tennessee State University, Johnson City, TN 37614, USA

**Dr. Hong Yong Peh**

Department of Pharmacology, Yong Loo Lin School of Medicine, National University of Singapore, Singapore City, Singapore

Deadline for manuscript submissions:

**closed (31 May 2024)**

### Message from the Guest Editors

Vitamin E research has progressively evolved from an early emphasis on alpha-tocopherol solely as a lipophilic antioxidant inhibiting lipid peroxidation and oxidative stress. Moreover, early research did not always distinguish between natural alpha-tocopherol (RRR-alpha) and synthetic alpha-tocopherol (all-racemic-alpha). We now recognize that the four tocopherols and the four tocotrienols that comprise the vitamin E vitamers have distinct chemical, stereochemical, and biochemical properties as well as functions independent of their roles as antioxidants. Even after decades of research, there remains much controversy around the risk/benefit ratio of vitamin E supplementation in cancer, cardiovascular disease, metabolic syndrome, type 2 diabetes, aging, and exercise physiology. Future basic, clinical, and kinesiological research will be needed to settle these issues and to further define the potential benefits of vitamin E vitamers.

For this Special Issue, we invite authors to submit novel work or reviews on the importance of advancing basic, clinical, and kinesiological vitamin E research.

Sciences, University of Naples  
"Federico II", Via Cintia 4, I-80126  
Naples, Italy

## Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of "oxidative stress" a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
