Deadline for manuscript
submissions:

closed (31 January 2022)

Message from the Guest Editor

Oxidative stress and inflammation are intricately linked mechanisms and are significant drivers in the development and progression of cardiovascular disease. Although reactive oxygen species (ROS) are a natural by-product of metabolism, oxidative stress occurs when there is a build-up of ROS that are unable to be scavenged by the available intracellular antioxidants. Further research is required not only to develop a better understanding of the mechanisms underlying oxidative stress and inflammation in cardiovascular disease but also to aid in the development of targeted interventions to combat both inflammation and oxidative stress. The importance of understanding cardiovascular diseases has been further highlighted this past year during the COVID-19 pandemic where cardiovascular diseases predict a greater chance of morbidity and mortality among COVID-19-infected individuals.

We are inviting you to submit research or review articles to the second volume of this Special Issue on “Oxidative Stress and Inflammation in Cardiovascular Diseases”, which will be dedicated to providing further insight into recent developments in the field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of "oxidative stress" a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
