Oxidative Stress and Inflammation in Obesity

Guest Editors:

Prof. Dr. Maurizio Crestani

Prof. Dr. Catherine Mounier

Prof. Dr. Christian Wolfrum

Deadline for manuscript submissions:
closed (10 October 2023)

Message from the Guest Editors

The goal of this Special Issue is to gather updated knowledge on the topic of oxidative stress and inflammation in different organs, including, but not limited to, adipose tissues, the liver, skeletal muscles, the pancreas, and the brain. We aim to publish manuscripts in the form of both research and review articles. Authors are encouraged to submit the results of their recent investigations in basic science as well as clinical studies and to discuss original ideas and hypotheses in the field. We expect to stimulate discussion on fundamental questions that may translate to clinical settings.

Special Issue

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of "oxidative stress" a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (*Food Science & Technology*) / CiteScore - Q1 (*Food Science*)
