

Special Issue

The Significance of Redox Biomarkers in the Evaluation of the Antioxidant Profile in Vitro and in Vivo

Message from the Guest Editors

In this Special Issue, we invite the researchers to contribute both review papers and original research articles that will approach the issue of using biomarkers in order to evaluate on the one hand the antioxidant status of nutritional agents and plant extracts in vitro and on the other hand the redox status of a wide range of organisms in vivo. Potential topics include but are not limited to the following:

- Biomarkers used for the evaluation of in vivo antioxidant mechanisms;
- Biomarkers for assessing the antioxidant activity of plant compounds in vitro;
- Estimation of redox status in exercise context;
- Antioxidant status in disease using redox biomarkers;
- Estimation of redox status in aging;
- Assessment of the antioxidant status of the host after insulted by pathogenic microorganisms;
- The role of redox biomarkers evaluating antioxidant status of a great variety of organisms in the past, present, and future;
- Redox biomarkers assessing antioxidant activity: the field of redox biology under a philosophical and historical aspect.

Guest Editors

Prof. Dr. Dimitrios Kouretas

Department of Biochemistry and Biotechnology, University of Thessaly, Larissa, Greece

Dr. Aristidis S. Veskokoukis

Department of Nutrition and Dietetics, School of Physical Education, Sport Science and Dietetics, University of Thessaly, Argonafton 1, 42132 Trikala, Greece

Deadline for manuscript submissions

closed (31 October 2020)

About the Journal

Message from the Editor-in-Chief

It has been recognized in medical sciences that in order to prevent adverse effects of “oxidative stress” a balance exists between prooxidants and antioxidants in living systems. Imbalances are found in a variety of diseases and chronic health situations. Our journal *Antioxidants* serves as an authoritative source of information on current topics of research in the area of oxidative stress and antioxidant defense systems. The future is bright for antioxidant research and since 2012, *Antioxidants* has become a key forum for researchers to bring their findings to the forefront.

Editor-in-Chief

Prof. Dr. Alessandra Napolitano
Department of Chemical Sciences, University of Naples “Federico II”,
Via Cintia 4, I-80126 Naples, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, PubAg, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Medicinal) / CiteScore - Q1 (Food Science)
