

## Applied Mathematics in Robotics: Theory, Methods and Applications

Guest Editors:

**Dr. Chengxi Zhang**

Associate Professor, School of Internet of Things Engineering, Jiangnan University, Wuxi 214082, China

**Dr. Weisong Wen**

Department of Aeronautical and Aviation Engineering, The Hong Kong Polytechnic University, Kowloon, Hong Kong, China

**Prof. Dr. Jin Wu**

Department of Electronic and Computer Engineering, Hong Kong University of Science and Technology, Hong Kong, China

Deadline for manuscript submissions:

**31 December 2024**

### Message from the Guest Editors

Robotics is the study and application of intelligent systems that can sense, think, and act. It has broad and promising applications in various fields, such as industry, the military, education, and entertainment. It also depends on the theories and methods of applied mathematics, such as optimization, statistics, probability, logic, graph theory, complex networks, and machine learning. Applied mathematics gives robotics a solid mathematical foundation and also provides tools and ideas for innovation and improvement. This Special Issue collects and showcases the latest advances of applied mathematics in robotics, in terms of theory, methods, and applications. We invite research on different types of robots, such as manipulators, walking robots, soft robots, haptic robots, microrobots, and swarm robots, and on different tasks, such as grasping, manipulation, motion, navigation, collaboration, and interaction. The goal of this Special Issue is to enhance the communication and collaboration between applied mathematics and robotics and to foster the development and application of robotic technology.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Takayuki Hibi

Department of Pure and Applied  
Mathematics, Graduate School of  
Information Science and  
Technology, Osaka University, 1-5  
Yamadaoka, Suita 565-0871,  
Japan

## Message from the Editor-in-Chief

Mathematics permeates all kinds of academic worlds and is a fountain flowing with innovative development. The journal *AppliedMath*, publishing high-quality refereed papers discussing various aspects of applied mathematics, is dedicated to promoting the integration of mathematics with applied disciplines to cultivate a profitable frontier of mathematics. The journal highlights articles devoted to the mathematical treatment of questions and phenomena arising in physics, chemistry, biology, medicine, pharmacy, engineering, information science, social sciences, and humanities. One of the missions of this journal is to serve scientists by quickly announcing the seeds of significant mathematical breakthroughs in science and technology.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **ESCI (Web of Science)**, **Scopus**, **EBSCO**, and **other databases**.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.2 days after submission; acceptance to publication is undertaken in 11.9 days (median values for papers published in this journal in the first half of 2024).
