

## Green Hydrogen Prospects around the World

Guest Editors:

### Dr. Tiago Pinto Ribeiro

Centre of Materials and Building Technologies (C-MADE),  
Department of Civil Engineering and Architecture, University of Beira Interior, 6201-001 Covilhã, Portugal

### Dr. Ana Margarida Luís de Sousa

Centre for Natural Resources and the Environment (CERENA),  
Instituto Superior Técnico (IST),  
University of Lisbon, Lisbon, Portugal

Deadline for manuscript submissions:

**closed (30 September 2023)**

### Message from the Guest Editors

Green hydrogen was thrust into academic discourse following discussions concerning one of academia's hottest topics, technology for leveraging energy transition to a worldwide reality.

In addition to issues related to innovative technologies producing green hydrogen through electrolysis or for storage and transport, conversion and re-conversion processes can be presented. For instance, the technology readiness level (TRL) of liquefaction or regasification, ammonia synthesis or cracking, and hydrogenation or dehydrogenation processes need to be improved for large-scale projects. Consequently, all aspects of the hydrogen supply chain, from the electrolyser to the final end-use can be addressed. Furthermore, this Special Issue welcomes all issues related to regulation, taxation, and economic analysis.

Therefore, we regard this Special Issue as a much-needed space to gather experts' views on both the potential and the current developments of green hydrogen projects and innovative technologies around the world.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**  
Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
