Advancements in Satellite Time Transfer and Positioning Techniques

Guest Editors:

Dr. Weijin Qin

National Time Service Center of
Chinese Academy of Sciences,
Xi'an 710600, China

Dr. Daqian Lyu

College of Electronic Engineering,
National University of Defense
Technology, Hefei 230037, China

Dr. Fu Zheng

Research Institute for Frontier
Science, Beihang University,
Beijing 100191, China

Message from the Guest Editors

The Global Navigation Satellite System (GNSS) plays an important role in time and frequency transfer. The accuracy of satellite time transfer can reach nanoseconds and sub-nanoseconds. This presents a significant advantage due to the wide coverage, convenience and high accuracy. We are pleased to invite you to demonstrate your latest research with us.

- GNSS time transfer algorithm/application
- GNSS on-board clock evaluation
- two-way time transfer algorithm
- low-orbit time transfer algorithm/application
- laser time transfer

Deadline for manuscript
submissions:

20 January 2025

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
