Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a forthcoming Special Issue titled "Recent Advances in Parallel Computing and Big Data". This Special Issue aims to highlight significant developments in parallel computing technologies that effectively tackle the challenges in big data analysis, artificial intelligence models and large-scale parallel applications. By focusing on scalable and efficient solutions, we explore how these technologies are critical in various domains.

Topics of interest for this Special Issue include, but are not limited to, the following:

- Innovative parallel algorithms for big data processing;
- Numerical methods and parallel algorithms for the advanced modeling and simulation;
- Architectures and frameworks for integrating big data and parallel computing;
- Advances in distributed databases and file systems for handling big data;
- Challenges and solutions in data-intensive environments for parallel computing systems

We invite researchers to submit their original research articles, comprehensive review papers and short communications that push the frontiers of knowledge in parallel computing and big data.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
