### Message from the Guest Editor

Artificial intelligence (AI) has become a common term in daily life, and its applications are becoming more frequently used in medicine in general and dentistry in particular to help medical decision-making processes and nonspecialists obtain expert-level information.

Currently, AI is rapidly advancing beyond image-based dental practice, and the role of AI in dentistry will be greatly expanded.

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
