

Optical Properties of Functional Nanomaterials

Guest Editor:

Dr. Vittorio Scardaci

Dipartimento di Scienze
Chimiche, Università degli Studi
di Catania, Viale A. Doria 6, 95125
Catania, Italy

Deadline for manuscript
submissions:

closed (10 October 2023)

Message from the Guest Editor

The interaction of light with matter comprises a wide range of phenomena, such as absorption, emission, diffraction, and reflection, which, if appropriately analyzed, provide a full spectrum of information about a material. Materials with at least one dimension below 100 nm, known as nanomaterials, behave significantly differently from bulk materials due to unique properties that cannot be observed in the related bulk materials but only at the nanoscale. Additionally, optical properties can be controlled by macroscopically assembling nano-objects. Exploring such properties allowed the advancement of many fields, including plasmonics, optoelectronics, photonics, sensing, nanomedicine, etc. This Special Issue welcomes both original research papers and review papers on both fundamental science and applications on nanomaterials related to the following topics:

Plasmonics

Metamaterials

Magnetic materials

Nonlinear optical properties

Bio-nanomaterials

Theory and simulations

Optical sensing

Optoelectronics

Photonics

Nanomedicine

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
