Message from the Guest Editor

Dear colleagues,

Even though wide ranges of MOFs are available in terms of structures and compositions, examples of successful practical applications are limited yet to now. For this purpose, simple and high yielding synthetic strategies are requested and MOF type material's unique advantages should be appealed to markets. We hope to provide promising possibilities to commercialize MOF materials with this special issue.

Prof. Jungseok Heo

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
