Message from the Guest Editors

Emerging Trustworthy Artificial Intelligence Technologies enable Autonomous Systems to learn, adapt to changes, and reason under uncertainties in possibly critical industrial applications and evolving industries. Good examples are the pioneering Machine Learning and Artificial Intelligence systems for industrial Quality Control and Zero-Defect Manufacturing. Our Special Issue aims at how can we plan, develop, construct, and certificate Trustworthy Artificial Intelligence in Industry 4.0.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
