# Ferroelectric Materials: Synthesis, Characterization and Applications

Guest Editors:

# Dr. Dmitry Karpinsky

SSPA "Scientific-Practical Materials Research Centre of NAS of Belarus", 220072 Minsk, Belarus

#### Dr. Vladimir Khomchanka

CFisUC, Department of Physics, University of Coimbra, 3004-516 Coimbra, Portugal

Deadline for manuscript submissions: **20 April 2025** 

#### Message from the Guest Editors

Ferroelectrics, a class of dielectric materials, have attracted interest from the scientific community for decades. The physicochemical parameters of ferroelectric materials are extremely sensitive to external electromagnetic fields, pressure, and temperature; thus, they are widely used in various electronic devices. Recent progress in elucidating the structure and properties of these compounds, whose chemical composition is similar to morphotropic-phase boundaries, has fostered further fundamental investigations into ferroelectrics.

This Special Issue of Applied Sciences aims to summarize recent advances in the "structure-properties" relationship of ferroelectrics with an emphasis on relevant phenomena observed at the local scale. Contributions may include, but are not limited to, the following topics: synthesis; processing; theoretical and experimental methods of studying the structure and functional properties of ferroelectric and piezoelectric materials; domain wall phenomena; evolution of crystal structure and physicochemical parameters under external stimuli, polarization switching; applications of electric materials; etc.

## **Editor-in-Chief**

#### Message from the Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo** Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec,

CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
