

Earthquake Engineering and Seismic Risk

Guest Editors:

Dr. Amir M. Yousefi

School of Engineering, Design and Built Environment, Western Sydney University, Sydney, Australia

Prof. Dr. Bijan Samali

Centre for Infrastructure Engineering, School of Engineering, Design and Built Environment, Western Sydney University, NSW, Australia

Deadline for manuscript submissions:

20 April 2025

Message from the Guest Editors

Factors such as the high cost of land, the desire to curb urban sprawl, and the necessity to preserve valuable agricultural land have collectively driven the construction of building structures upwards. As a consequence, high-rise structures have emerged as prominent symbols of modern civilization, transforming the skylines of cities worldwide. However, a primary challenge associated with the modern structures is their vulnerability to earthquake and seismic forces. The aim of this Special Issue is to cover earthquake engineering and seismic risk particularly within the building industry. This Special Issue also focuses on the behaviour and design of building structures to combined seismic and wind forces. In this Special Issue, original research articles and reviews are welcome. Research areas may include but are not restricted to structural steel research, structural engineering and innovations, structural dynamics, earthquake engineering, structural stability, seismic risk, and disaster engineering.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
