

## Variability of the Usability of Advanced Innovation Technologies of BIM, AI, VR, IoT in Research and Practice

Guest Editors:

**Dr. Annamária Behúnová**

Faculty of Mining, Ecology,  
Process Control and  
Geotechnologies, Institute of  
Logistics and Transport,  
Technical University of Košice,  
Park Komenského 19, 042 00  
Košice, Slovakia

**Dr. Lucia Knapčíková**

Faculty of Manufacturing  
Technologies with a seat in  
Prešov, Technical University of  
Košice, Bayerova 1, 08001 Prešov,  
Slovakia

Deadline for manuscript  
submissions:

**20 November 2024**

### Message from the Guest Editors

Most industrial sectors are generally considered conservative. Nevertheless, innovations frequently emerge, and new trends in technologies, materials, and construction systems are promoted. In addition to new technologies, individual processes and materials and digitization elements significantly change project preparation, planning, implementation, and realization. All these innovative elements and procedures are tools brought by the fourth industrial revolution, also known as Industry 4.0. The Industry 4.0 concept seeks to digitize industrial processes to create an adaptable large-scale network of production and services. The concept of the industrial revolution embodies digitization, automation, and increased use of information and communication technologies in all sectors. The construction industry in particular uses technologies for efficiency and sustainability within the individual phases of the project, such as BIM, AI, VR, IoT, etc.

This Special Issue aims to present new ideas and experimental results in the field of using innovative technologies in all industry sectors

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**

Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
