

The Mobilization, Speciation and Transformation of Organic and Inorganic Contaminants in Soil-Groundwater Ecosystems, 2nd Edition

Guest Editors:

Prof. Dr. Yizhi Sheng

State Key Laboratory of
Biogeology and Environmental
Geology, China University of
Geosciences, Beijing 100083,
China

Dr. Wanjun Jiang

China Geological Survey, Tianjin
300170, China

Prof. Dr. Min Zhang

Chinese Academy of Geological
Sciences, Beijing 100037, China

Deadline for manuscript
submissions:

20 January 2025

Message from the Guest Editors

Soil and groundwater systems serve as a crucial link between the hydrosphere, pedosphere, atmosphere and anthroposphere. The well-being of soil and groundwater is vital for the health of the biosphere and human life under different land use types. However, in regions such as arid and semi-arid inland basins, plateau grassland areas and hilly mountainous areas, intensive human activities pose significant risks of contamination to soil and groundwater systems. Therefore, it is crucial to investigate the sources, migration and transformation of these pollutants in soil-groundwater systems across different media and interfaces. This Special Issue focuses on the spatiotemporal evolution of soil-groundwater contamination in different typical regions/sites, the associated ecological and human health risks, and natural attenuation and hydrogeochemical models for soil-groundwater systems.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
