closed (20 September 2023)

Message from the Guest Editors

Text mining technology is now widely used for a wide range of government, research and business needs. All of these groups can use text mining to manage records and find documents relevant to their day-to-day activities. Scientific researchers incorporate text mining approaches in efforts to organize large text data sets (solving the problem of unstructured data) to determine the ideas communicated through text, and to support scientific discoveries in various fields.

This Special Issue will be devoted to new perspectives on text mining and resulting applications, as well as text mining in the age of social media.

The topics discussed in this Special Issue will focus on the latest methods and advances in text mining.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
