

Solving Environmental and Cultural Heritage Issues through Analytical Tools

Guest Editor:

Prof. Dr. Paola Fermo

Dipartimento di Chimica,
Università degli Studi di Milano,
Via Golgi 19, 20133 Milan, Italy

Deadline for manuscript
submissions:

20 April 2025

Message from the Guest Editor

The application of analytical methodologies for the study and characterization of environmental and cultural heritage matrices is becoming increasingly widespread, taking into account continuous instrumental developments. This Special Issue is dedicated to novel case studies in which conventional methods are applied in synergy with more innovative ones and/or others which have seldom been used in these research fields to solve issues and problems concerned with cultural heritage and the environment. Such methods may include the use of a wide range of techniques depending on the specific application: elemental and/or molecular analyses, destructive and/or micro-destructive methods, in situ applications, and/or laboratory settings. Environmental samples include air, water, soil, and food, while all materials of historical and artistic interest are included for cultural heritage applications. Scientific papers with an emphasis on the role and importance of analytical techniques that help to tackle the issue of interest are encouraged.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
