Advances in Combustion Engineering

Guest Editor:

Dr. Adrian Irimescu

Istituto Motori, Consiglio Nazionale delle Ricerche, 80125 Napoli, Italy

Deadline for manuscript submissions:

closed (20 November 2021)

Message from the Guest Editor

The current Special Issue plans to investigate the most recent advances in combustion processes and how these developments fit within the current energy and mobility scenario. Papers that cover all combustion-related processes are welcome, ranging from basic studies of non-and premixed flames, to thermodynamic processes connected with thermal energy conversion, including active as well as passive methods for emissions control. The unifying theme is the scrutiny of advances within the current situation and foreseen scenarios, and thus interactions with other forms of energy conversion are also of significant interest, including hybrid powertrains.

Editor-in-Chief

Prof. Dr. Giulio Nicola CerulloDipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
