submissions:

closed (31 May 2022)

Message from the Guest Editor

Dear fluid mechanics community,

The comprehensive use of fluid mechanics has always been of key relevance for the development of human beings though numerous applications from the classical field of engineering, with its different sub-disciplines, to physics or even to medicine by modelling simple or complex flows, including Newtonian and non-Newtonian fluids. The progressive implementation of new techniques as computational fluid dynamics (CFD) has experienced a great increase over the last few decades as its use has become more feasible for most experts worldwide.

As Guest Editor, I cordially invite you to present works that rigorously show new concepts, developments, and complete and comment on the state-of-the-art developments in the field, referring to the general phenomenon of fluid mechanics, covering aero/hydrodynamics, CFD, heat transfer and other related fields, to be published in this Special Issue, providing originality, usefulness, clarity, and well-founded conclusions.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
