University, Zelwerowicza 4, 35-
601 Rzeszow, Poland

Dr. Karolina Pycia

Department of Food Technology
and Human Nutrition, Institute of
Food Technology, College of
Natural Science, University of
Rzeszow, Zelwerowicza Street 4,
35-601 Rzeszow, Poland

Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editors

Natural compounds are secondary metabolites of a pharmacological or toxicological nature, which usually occur in plants in small amounts. Terpenoids, alkaloids, and polyphenolics are among the most important natural compounds that exhibit antimicrobial activity. The increasing incidence of drug-resistant pathogens has drawn the attention of the pharmaceutical and scientific communities towards studies on the potential antimicrobial activity of plant-derived substances, an untapped source of antimicrobial chemotypes, which are used in traditional medicine in different countries. Several phytotherapy manuals have mentioned various medicinal plants for treating infectious diseases as urinary tract infections, gastrointestinal disorders, respiratory disease, and cutaneous infections.

This Special Issue will identify and review the latest plant-based natural compounds that have been demonstrated to have antimicrobial activity. The principal goal of the Special Issue is to cover all aspects of chemical relevance, biological activities, and the development of analytical methods for their identification.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
