Message from the Guest Editor

The aquatic product processing industry is becoming more and more popular and attracting increasing attention in the fish industry. So-called “processing works, circulation works, production works” invigorate processing, helping goods to flow freely, which opens up a permanent high-speed channel for aquaculture production. Therefore, the development of the aquatic product processing industry plays the role of a bridge for the development of fisheries. It is not only important in accelerating the development of modern fisheries, however, but also represents an effective way to optimize fishery structure and realize the value added and efficiency of the industry.

For this Special Issue, I would like to invite researchers in the field to contribute their original and excellent reviews, articles, reports, etc. I look forward to reading your works.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
