Biotechnology, Faculty of
Biotechnology and Animal
Husbandry, West Pomeranian
University of Technology, 70-310
Szczecin, Poland

Deadline for manuscript
submissions:

closed (20 June 2021)

Message from the Guest Editors

Dear Colleagues,

Bacterial cellulose is undoubtedly the most promising biomaterial in recent decades. The number of studies concerning this fascinating polymer has been rapidly growing and, every year, new potentials for its application are revealed. Some of us surely still reflect upon the fascinating and impressive achievements presented this year during the 4th International Symposium on Bacterial Nanocellulose in Porto, Portugal. Therefore, we would like to invite you to submit your latest research to a Special Issue of *Applied Science* entitled “Bacterial Cellulose Biomaterials”. We cordially welcome all research articles concerning bacterial cellulose, with special emphasis on results related with its biomedical, bioengineering, and biotechnological applications. We hope that this Special Issue will be a worthwhile compendium of current knowledge which will aid other researchers as they navigate through the exponentially growing data on bacterial cellulose manufacturing and applications.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
