**Dr. Adonis Haidar**

School of Architecture, University of Liverpool, Liverpool, UK

**Dr. Suha Jaradat**

School of Engineering and the Built Environment, Edinburgh Napier University, Edinburgh EH11 4BN, UK

Deadline for manuscript submissions:

**closed (21 April 2022)**

### Message from the Guest Editors

Dear Colleagues,

The use of building information modelling continues to expand as the preferred method of delivering projects in the built environment. This object-oriented approach enables multiple forms of representation, allowing new forms of data analytics and insight. The ongoing development in the computer sciences and associated frontend technologies mean that it is appropriate to re-evaluate the theoretical basis of BIM and its potential to provide a foundation for other systems of task and activity augmentation. BIM, although data-centric, can be seen as the starting point in the development of knowledge and intelligent systems. Developments in AI, VR, IOT, block chain and GIS all offer new questions when it comes to the future development of BIM.

The Special Issue, entitled "BIM Implementation to Meet the Changing Demands of the Construction Industry", offers an opportunity to re-evaluate the theoretical basis underpinning BIM and also to consider BIM's role in a digitally emerging world.

Dr. Stephen Paul Coates

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**  
Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
