Application of Electrochemical Sensors in Biomedical Diagnostics

Guest Editors:

Prof. Dr. Ayemeh Bagheri Hashkavayi

Department of Electrical and Computer Engineering, North Carolina State University, Raleigh, NC 27606, USA

Dr. Nirul Masurkar

Department of Mechanical Engineering, Wayne State University, Detroit, MI 48202, USA

Dr. Leila Kashefi-khyrabadi

School of Integrative Engineering, Chung-Ang University, 84 Heukseok-ro, Dongjak-gu, Seoul 06974, Korea

Deadline for manuscript submissions: closed (25 May 2022)

Message from the Guest Editors

The potential applications of electrochemical sensors in biochemical and biomedical diagnostics are at the forefront of other methods due to their unique characteristics, such as functional diversity, miniaturization, intelligence, low cost, point-of-care application, and high sensitivity.

In this Special Issue, we aim to explore recent advances in diagnostic technologies through electrochemical biosensors. We welcome manuscripts covering the following areas:

- 1. Exosomes and cancerous biomarkers detection using electrochemical biosensors;
- 2. Electrochemical biosensors for molecular diagnostics;
- 3. Development of electrochemical biosensors for the detection of disease-related biomarkers;
- 4. Nanomaterials-based signal amplification in electrochemical biosensors;
- 5. Enzyme-based electrochemical biosensors;
- 6. Development of microfluidic electrochemical biosensors and lab-on-chip sensing devices;
- 7. Simultaneous multianalyte detection;
- 8. Electrochemical biosensors in point-of-care detection devices
- 9. Novel material-based biosensor
- 10. Assembly and micro-fabrication of biosensor
- 11. Advancement of the electrochemical biosensors in Lifescience.

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec,

CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
