Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editors

Dear Colleagues,

Global warming caused by greenhouse gas emissions from the petrochemical industry and the burning of fossil fuels is one of the most serious problems for humanity. Many researchers and entrepreneurs claim that it is the vast biomass resources that can help to reduce dependence on fossil fuel resources or even replace them in the future. Biomass acts as a feedstock in the production of biogas (as a renewable energy source) through anaerobic digestion. Among the feedstocks currently used in biogas production, agricultural residues, energy crops, organic-rich wastewater, the organic fraction of municipal solid waste, and the organic fraction of industrial waste are most often mentioned. Biomethane is derived from biogas properly processed in a purification process and can be used directly as vehicle fuel, or injected into the natural gas grid, or converted into electricity and heat in cogeneration units. Due to the fact that technological solutions to technical problems in the area of anaerobic digestion tend to vary depending on the feedstocks used, it is necessary to carry out research on the optimization of this process.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
