Message from the Guest Editors

Computer science and artificial intelligence play a central role in the healthcare domain from different points of view, e.g., clinical research, decision support, process organization, management and optimization, telemedicine and public health. In this Special Issue, we encourage the submission of original research articles, review articles and short technical communications from the above topics and areas. More specifically, we would like to collect methodological articles with applications and recent developments in the context of artificial intelligence and biomedical informatics applied to the healthcare domain.

Deadline for manuscript
submissions:

da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
