

Knowledge-Based Biotechnology for Food, Agriculture and Fisheries

Guest Editors:

Prof. Dr. Jesus Simal-Gandara

Department of Analytical and Food Chemistry, Food Science and Technology Faculty, University of Vigo, 32004 Ourense, Spain

Prof. Dr. Jianbo Xiao

Analytical and Food Chemistry Department, Faculty of Food Science and Technology, Universidade de Vigo, Ourense Campus, E-32004 Ourense, Spain

Dr. Md Afjalus Siraj

Department of Therapeutic Radiology, Yale School of Medicine, Yale University, New Haven, CT 06510, USA

Deadline for manuscript submissions:
closed (31 October 2023)

Message from the Guest Editors

Dear Colleagues,

Renewable biological resources are the basis of a knowledge-based biotechnology (food, feed, agriculture, forest based, fisheries, aquaculture, biochemistry, etc.). The increasing demand for biological resources, both in quantity and quality, can only be met through innovation and advancement of knowledge in the sustainable management, production and use of these biological resources (micro-organisms, plants and animals). This Special Issue brings together all relevant actors (appropriate research disciplines and industrial sectors, farmers, forest owners, etc.) to develop the basis for new, sustainable, safer, affordable, eco-efficient and competitive products. This will help increase the competitiveness of agriculture and biotechnology.

This key research into the safety of food and feed chains, diet-related diseases, food choices and the impact of food and nutrition on health will help to fight diet-related disorders (e.g., obesity, allergies, etc.) and infectious diseases (e.g., avian flu, bluetongue, etc.), while making important contributions to the implementation of existing regulations in the area of animal and plant health.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
