Message from the Guest Editors

Dear Colleagues,

CAD is applied in many engineering-based industries such as shipbuilding, aerospace design, architectural, industrial design, and car manufacturing. But for the last one, it's more than useful. It was first applied in the automotive way back in the middle 1960s. Ever since then, its use in car design has expanded significantly.

Vehicle design in Industry 4.0 is highly digital. Furthermore, it's accessible to stakeholders across the manufacturing chain, thanks to the magic of product lifecycle management systems. It enables them to work with other experts and simulate performance. As technology evolves at lightning speed, collaborations have become an essential part of effective manufacturing.

This special issue aims to address how CAE has contributed to vehicle development and address its future applications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
