Message from the Guest Editor

The issue focuses on research advances related to rheology and quality of grain products, oilseeds, pseudocereals and others. In the last decade a huge development has been noticed in the grain products rheology field measurements due to their impact on their quality. The issue focuses on papers advancing original research and review papers at the interface between rheological properties of grain products and other aspects such as grains or products composition, functional and nutritional characteristics, microstructure, textural and sensorial analysis along with new instrumentation and methodologies relating to these areas.

Prof. Georgiana Gabriela Codină
Guest Editor

Keywords

- grain cereals
- grain legumes
- grain oilseeds
- pseudocereals
- rheological properties
- microstructure analysis
- textural properties
- processing
- health benefits
- nutritional value
- new products development-derived products
- consumer acceptance

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
