

Advances in Combustion and Emissions Control

Guest Editors:

Dr. Wenming Yang

Department of Mechanical Engineering, National University of Singapore, 9 Engineering Drive 1, Singapore 117575, Singapore

Prof. Dr. Jianfeng Pan

School of Energy and Power Machinery, Jiangsu University, Zhenjiang 202013, China

Deadline for manuscript submissions:
closed (21 March 2022)

Message from the Guest Editors

The world has witnessed significant climate change as a result of increased greenhouse gas emissions accompanied with fast economic growth and escalating global energy demand. Currently, the direct burning of fossil fuel is still the biggest source of energy production—according to BP 2020 Energy Review, fossil fuels account for over 80% of the total global energy consumption. To address people's concerns regarding global warming, it is very urgent for us to take measures to improve efficiency and reduce the major emissions of power generation systems fueled by fossil fuels or biofuel. In this Special issue, we invite submissions exploring cutting-edge research and recent advances in the fields of **combustion organization and emission control in various power generation systems such as internal combustion engines, gas turbine, biomass boiler, coal boiler, CFB boilers, micro power generators, etc.** Both theoretical and experimental studies are welcome, as well as comprehensive review and survey papers.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
