Computer Vision in Mechatronics Technology

Guest Editors:

Dr. Sergiu Dan Stan
Associate Professor, Department of Mechatronics and Machine Dynamics, Technical University of Cluj-Napoca, Cluj-Napoca, Romania

Prof. Dr. Milos Manic
Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Dr. Milos Simonovic
Associate Professor, Department for Mechatronics and Control of MEF, Mechanical Engineering Faculty Niš, A. Medvedeva 14, 18000 Niš, Serbia

Deadline for manuscript submissions:
closed (30 November 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is devoted to the application of computer vision in mechatronics technology. Both theoretical and experimental studies are welcome, as well as comprehensive reviews and survey articles. Topics of interest for this Special Issue include but are not limited to:

- Computer vision in mechatronics/robotics;
- Obstacle detection;
- Computer vision in sports;
- Serial robots, parallel robots, vision technology, vision inspection, robot programming;
- Action recognition in realistic sports
- 3D machine vision and additive manufacturing;
- Performance indices of robots;
- ROS and machine vision in mechatronics;
- Computer vision and robotics for medical application;
- Model-based control of mechatronic systems;
- Control systems based on vision;
- Mechatronics and machine vision in practice;
- Computer vision in mechanical systems;
- Computer vision in CAD/CAM engineering;
- Computer vision for autonomous vehicles, unmanned air vehicles.

Prof. Dr. Sergiu Dan Stan
Prof. Dr. Miloš Manić
Prof. Dr. Miloš Simonović
Guest Editors

Special Issue

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
