## Cyber Security in the Industrial Internet of Things

Guest Editors:

### Dr. Giorgio Di Natale

TIMA – CNRS, Université  
Grenoble-Alpes, Grenoble INP,  
UMR 5159, 46, avenue Félix  
Viallet, 38031 Grenoble, CEDEX,  
France

### Dr. Honorio Martin

Carlos III University of Madrid,  
Department of Electronic  
Technology, Avenida de la  
Universidad, 30, 28911 Leganés,  
Madrid, Spain

Deadline for manuscript  
submissions:

**closed (20 October 2021)**

### Message from the Guest Editors

The Industrial Internet of Things (IIoT) envisions a world where critical infrastructures are monitored and controlled through the network. The IIoT's adoption may allow for the optimization of many industry domains. Nevertheless, all of this interconnection will expand the cyberattack surface to unprecedented levels.

This Special Issue on “Cyber Security in the Industrial Internet Of Things” aims to stimulate open scientific discussions on new solutions and trends in response to the main security and trust challenges in the IIoT.

In this Special Issue we welcome both original research papers and review articles on diverse topics such as:

- software and hardware protection mechanisms
- trust and security lifecycle management
- trusted device identification and communication
- privacy issues
- cryptography and lightweight cryptography
- security-by-design
- blockchain technologies
- security in emerging fields: artificial intelligence, neural networks, deep-learning, and approximate computing
- case studies

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo**  
Dipartimento di Fisica,  
Politecnico di Milano, Piazza L.  
da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
