Selected Papers from the 5th International Conference on Supply Chain Management

Guest Editors:

Dr. Dimitrios Aidonis

Department of Supply Chain Management, International Hellenic University, 60100 Katerini, Greece

Dr. Charisios Achillas

Department of Supply Chain Management, International Hellenic University, 60100 Katerini, Greece

Dr. Ioannis Kostavelis

Department of Supply Chain Management, International Hellenic University, 60100 Katerini. Greece

Deadline for manuscript submissions:

20 November 2024

Message from the Guest Editors

Undeniably, logistics and supply chain management play huge roles within today's globalized economy, as they support the movement and flow of goods, together with many economic transactions. According to the European Commission, the growing importance of global supply chains has fundamentally changed the way the economy and goods manufacturing are organized. However, the recent COVID-19 pandemic highlighted the vulnerability of the modern economy, disrupting many supply chains during the outbreak, and the subsequent economic recovery led to further pressure on the global supply system. Indisputably, supply chain resilience may improve through international cooperation, diversification, and the accelerated uptake of digital technologies.

The primary objective of 5th Olympus ICSC is to offer an international platform for the presentation and publication of the latest scientific research findings in the field of supply chain management. This conference provides valuable opportunities for the delegates to exchange innovative ideas, establish research and business connections, and foster global partnerships for potential collaboration.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
