Deadline for manuscript
submissions:
closed (31 August 2022)

Message from the Guest Editors

As an important optical dispersion element, diffraction grating is mainly used in spectrometers to realize the dispersion of polychromatic light in its early application. In recent years, with the development of science and technology, the utility of grating has expanded, no longer being not limited to spectral analysis. Its other optical properties, such as beam splitting, polarization, phase matching, etc., have attracted the attention of scholars. The participation of leading scientists in this field is crucial to guiding society and new users of this technology towards a world transformed by diffraction grating.

The scope of this issue covers the manufacturing technology of diffraction grating and its important applications in spectral analysis, optical holography, precision measurement, quantum optics, optical communication, information processing, laser energy modulation and other fields.

We welcome submissions exploring cutting-edge research and recent advances in the fields of the diffraction grating and its application fields. Both theoretical and experimental studies are welcome, as well as comprehensive reviews and survey papers.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
