

Foundry Materials and Technologies: Challenges and Future Trends

Guest Editors:

Prof. Dr. Artur Bobrowski

Faculty of Foundry Engineering,
AGH University of Science and
Technology, Aleja Adama
Mickiewicza 30, 30-059 Kraków,
Poland

Dr. Daniel Nowak

Faculty of Mechanical
Engineering, Wrocław University
of Science and Technology, 27
Wybrzeże Wyspiańskiego, 50370
Wrocław, Poland

Deadline for manuscript
submissions:

closed (31 July 2024)

Message from the Guest Editors

The foundry industry is evolving in parallel with the evolution of other industries, as it tries to keep up with the ongoing changes in production processes. In the wake of the changes taking place, new solutions are sought in the areas of manufacturing technology, reducing labor and production costs, and using new materials in production. In the production halls, on the other hand, process engineers strive to improve the quality of finished products while maintaining optimal production costs.

This Special Issue aims to cover all casting technologies and alloys (cast steel, cast iron, and non-ferrous alloys). Due to the topics covered in this Special Issue, we welcome articles on the application of modern solutions in casting production technology, 3D printing, the use of artificial intelligence, the generally understood concept of Industry 4.0 (applications of AI, IoT, and IIoT), modeling and simulation in casting processes, among others.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
