Deadline for manuscript
submissions:

closed (20 April 2023)

Message from the Guest Editor

We are pleased to announce that we are now accepting submissions for the Special Issue "Forensic Medicine and its Applications".

The number of unidentified corpses has increased in recent years, due to large-scale disasters, international conflicts, and terrorist incidents in various regions of the world. In the fields of forensic medicine and forensic dentistry, various methods have long been used to identify these unidentified corpses. However, the application of modern science, beginning with DNA fingerprinting, has made it possible to identify individuals with high probability, introducing a revolutionary change in personal identification.

However, several issues have arisen regarding DNA typing, which still need to be resolved. In addition, as a preliminary step to DNA typing, it is essential to narrow down the list of individuals who need to be matched; however, even now, it is not easy to accomplish this task using methods that target gender, age, dental features, and physical characteristics.

In this Special Issue, we invite submissions on state-of-the-art research and recent advances in the field of forensic personal identification.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
