Deadline for manuscript submissions:

closed (10 April 2021)

Message from the Guest Editors

Dear Colleagues,

We invite you to contribute to a Special Issue of the journal Applied Sciences, “Functional Food and Chronic Disease”.

Chronic diseases are multifactorial pathological conditions considered to be a serious public health problem, accounting for about 60% of deaths worldwide. Chronic diseases are difficult to recover from, and owing to the associated after-effects, require long-term treatment and observation. Foods and natural products or ingredients can be used to help treat, suppress, or prevent chronic diseases.

This Special Issue, “Functional Food and Chronic Disease”, focuses on the functional evaluation and mechanistic research of functional foods and ingredients in the prevention and suppression of chronic diseases. Articles on a wide range of related topics are also welcome. For this Special Issue, we welcome a broad range of article types, such as research methods including *in vitro*, *in vivo*, and epidemiological studies; reviews; systemic reviews; and clinical trials.

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
