Stellenbosch University,  
Saldanha 7395, South Africa

**Prof. Dr. Precious Sibanda**

School of Mathematics, Statistics  
& Computer Science,  
Pietermaritzburg campus,  
University of KwaZulu-Natal,  
Scottsville 3209, South Africa

### Message from the Guest Editors

This Special Issue is devoted to research on contemporary developments in the heat transfer characteristics of the flow of non-Newtonian fluids. Research papers in this direction are invited from computational, experimental, or theoretical approaches (or any combination thereof). For consideration, each research paper must include the two important fluid dynamical aspects in their investigation, namely, the heat transfer (or non-isothermal flow) aspect and the non-Newtonian fluid aspect. Comparative investigations, e.g., on heating and cooling applications, between non-Newtonian fluids and Newtonian fluids or between different types of non-Newtonian fluids are welcomed. Non-Newtonian fluids will be considered in the broadest sense, ranging from generalized Newtonian fluids to viscoelastic fluids. Contributions on the development of novel computational, experimental, or theoretical methodologies to study the non-isothermal flow of non-Newtonian fluids are also welcomed.

Deadline for manuscript  
submissions:

**closed (30 August 2023)**

da Vinci 32, 20133 Milano, Italy

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
